

給石虎一個安心的家

A Safe Home for Leopard Cats

文圖 | 編輯部

石虎為瀕臨絕種保育類野生動物，主要出沒在苗栗淺山地區，但長期因棲地縮小和品質惡化等問題，石虎被迫進入人類活動區域，導致雞舍衝突、犬貓威脅及路殺等憾事。近年來農政單位除了廣為宣導保育理念，也結合地方社區與農民的能量，積極守護石虎的生存空間。想為石虎保育盡一份心力，歡迎購買有「友善石虎農作標章」的農產品，用行動維護臺灣山林的野生魅力。

The leopard cat is an endangered wild animal mainly found in the hills of Miaoli. As its habitat is shrinking, the wildcat has been forced to move into areas of human activity. It is also often threatened by other animals like dogs or by roadkills. Agricultural authorities have been making a series of efforts including wildlife conservation and cooperation with local residents and farmers to preserve an adequate living space for the leopard cat. All people are welcome to purchase farm products marked with a leopard cat-friendly label to contribute their part to the cat's conservation.
